THE CARE MANIFESTO

A lift is for decades. So is our care.

An elevator is a machine in near-constant use – hundreds of journeys a week, year after year. What keeps it silent, smooth and safe is not luck. It is regular, expert attention from people who know exactly how it was built.

When your first year of complimentary service ends, Glide continues that same care without interruption – genuine YugX parts, factory-trained technicians, and a published scope with nothing hidden in fine print.

FEWER BREAKDOWNS	Planned upkeep catches wear before it strands anyone
------------------	--

LONGER LIFE	A well-maintained lift protects your capital for decades
-------------	--

STATUTORY SAFETY	Supports your duties under the Gujarat Lifts & Escalators Rules
------------------	---

PREDICTABLE COST	One budgeted annual figure, not surprise repair bills
------------------	---

Continuous cover matters: renew before your free-service year ends, and your lift never spends a day unprotected.

WHY YUGX, NOT ANYONE ELSE

We built it

Our technicians know your lift's design, tolerances and parts intimately – because they are ours.

Genuine parts

YugX components, not third-party substitutes that shorten equipment life.

Published scope

Every plan's coverage is printed, in full, in this catalogue. No exclusions sprung at breakdown time.

One-page paperwork

A summary contract you sign in minutes, with schedules you can actually read – no legal maze.

THE COLLECTION

One promise. Four levels of care.
