

■ ANY LIFT · ANY MAKE · ANY AGE

Modernise

THE RENEWAL COLLECTION

An older lift is not a lost cause. With MP’s modernisation engineering and YugX’s own crews, it becomes a new lift in the shaft it already owns – **engineering, not patchwork.**

PROGRAMMES	Six – from safety to connectivity, combined per survey
SURVEY	Free site diagnosis · written, staged proposal
COVERAGE	Any make – including lifts we never sold
SERVICE	Executed by YugX engineers · Hotline +91 90 88 66 3000

PROGRAMME 01

Safety

Controllers, door protection, ARD – to today’s standards.

PROGRAMME 02

Energy

Gearless machines, VVVF drives, LED – sharply lower consumption.

PROGRAMME 03

Comfort

Smoother starts, precise levelling, quieter travel.

PROGRAMME 04

Accessibility

EN 81-70 – levelling, tactile controls, voice.

PROGRAMME 05

Aesthetics

Cars, doors and signalisation renewed from the YugX collections.

PROGRAMME 06

Connectivity

Every modernised lift joins YugX Smart Mobility.

THE RENEWAL MANIFESTO

Any lift. Made new again.

A lift wears the way a building never shows: relays pit, guides dry, doors hesitate, standards move on. Somewhere between year fifteen and year twenty-five, every lift asks the same question – repair again, or renew properly.

Modernisation answers it with engineering: the parts that age are replaced with today's technology, the parts that are sound – often the car, rails and shaft itself – stay. The result rides, sounds and protects like a new installation, at a fraction of its cost and disruption.

RELIABILITY RESTORED Breakdowns end where worn components leave

SAFETY, CURRENT	IS 17900 · EN 81-20 – light curtains, ARD, overspeed protection
SHARPLY EFFICIENT	Gearless machines & VVVF drives cut energy use – with regenerative options
VALUE PROTECTED	Your capital, your compliance and your building's reputation

Modernised in stages – never all at once. The lift keeps serving the building while it becomes new.

WHY YUGX, NOT ANYONE ELSE

We survey first

A free site diagnosis of any make – followed by a written, staged proposal. No guesswork, no open-ended billing.

MP engineering inside

COMBI and SIMBI modernisation kits with the MP ecoGO controller – engineered in Seville, proven across 165,000+ lifts.

Our own crews

Installed and commissioned by YugX engineers – the car is retained wherever sound, so the building barely notices the works.

Then Glide takes over

Every modernised lift joins YugX Smart Mobility and continues under Glide care – documented and protected like a new installation.

THE PROGRAMMES

Six programmes. One renewed lift.

Programme – 01
SafetyCONTROLLER ·
MP ECOGOTHE NON-
NEGOTIABLE

- MP ecoGO controller with automatic rescue
- Light-curtain door protection
- UCM & overspeed protection

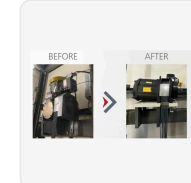

IS 17900 · EN 81-20 · ARD

Programme – 02
EnergyMACHINE ·
GEARLESS PM

THE QUIET SAVER

- Gearless machine – 95% fewer machine RPM
- VVVF drive & LED lighting
- Regenerative options that return power

GEARLESS · VVVF · REGENERATIVE

Programme – 03
ComfortDRIVE · GEARED
→ GEARLESSTHE DAILY
DIFFERENCE

- New-generation car door operator
- Precision levelling at every landing
- Noise engineered down, ride engineered up

SMOOTH · PRECISE · QUIET

Programme – 04
AccessibilityLANDING
PANELS &
DISPLAYS

THE OPEN DOOR

- Buttons with raised characters & contrast
- Position & direction displays
- Voice announcement and handrails

EN 81-70 · BARRIER-FREE

Programme – 05
AestheticsCAR OPERATING
PANELTHE VISIBLE
RENEWAL

- Car interiors from the Design Catalogue
- New COP & landing panels with displays
- Doors & signage refinished

INTERIORS · COP/LOP · DOORS

Programme – 06
ConnectivityTFT DISPLAYS ·
IOTTHE WATCHFUL
UPGRADE

- 24/365 link to the YugX service centre
- Health visible before faults become breakdowns
- Automatic rescue as standard

SMART MOBILITY · IOT ONBOARD

Every lift is a world of its own – your survey combines the programmes into one staged proposal, priced in writing before work begins.

THE ENGINEERING

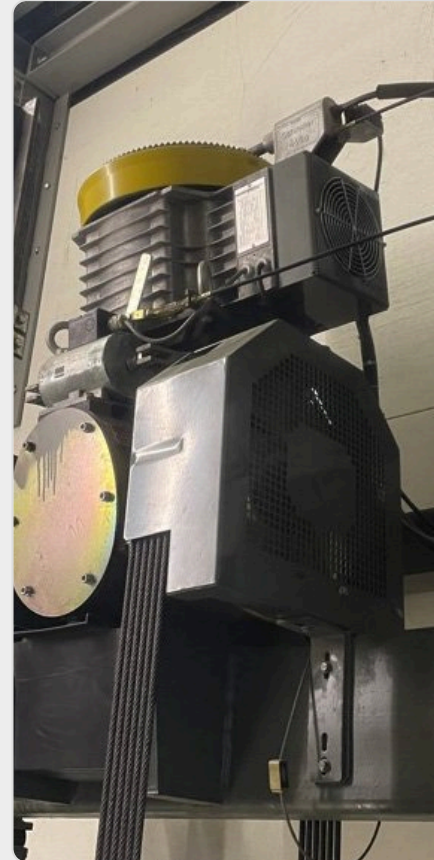

Kits, engineered. Not parts, improvised.

YugX modernises with MP's factory-engineered kits – matched to your lift by survey, pre-wired for clean installation, and certified as a system rather than a collection of parts.

COMBI	Machine-room electric lifts – Basic, Avant & Efficiency: MP ecoGO pre-wired installation, geared to gearless
COMBI OLEO	Hydraulic lifts – with the MP b power unit and iValve electronic valve
SIMBI	Machine-roomless lifts – including SIMBI Scorpio, turning an old geared MRL into a new-generation gearless lift
BEYOND RENEWAL	Where modernisation cannot be justified, a full YugX replacement – engineered for the existing shaft

What is sound, stays. The car, rails and shaft are retained wherever possible – minimal disruption to the building, and to its budget.

BEFORE & AFTER – THE MACHINE

BEFORE – GEARED MACHINE

AFTER – GEARLESS MACHINE

95% fewer

MACHINE REVOLUTIONS –
HEARD AS SILENCE

No gears, no oil – reduced heat,
fire risk minimised, and far less to
maintain.

MP ecoGO – THE
NEW CONTROLLER

THE JOURNEY

From survey, to silence.

Renewal is planned like a new installation – surveyed, staged, documented – while your lift keeps working for the building.

STEP ONE

The survey

A YugX engineer diagnoses your lift – any make, any age – free of charge.

STEP TWO

The staged proposal

Programmes combined into stages, each priced in writing. You choose how far, and how fast.

STEP THREE

The works

Executed in stages by YugX crews – down-days minimised, the car retained wherever sound.

STEP FOUR

Handover – and Glide

Tested, documented and handed over like a new lift; connected to Smart Mobility, protected under Glide.

Pricing for your site is shared personally with your staged proposal – followed by your contract, ready to sign.

SIMPLICITY AT EVERY STEP

STEP 01

Book the survey

One call to the hotline – a YugX engineer visits, measures and listens to your lift.

STEP 02

Choose your stages

Safety first, comfort next, aesthetics when ready – the staging is yours to decide.

STEP 03

Renew & relax

YugX crews execute; Glide carries your renewed lift forward – never a day unprotected.

MODERNISE – THE RENEWAL COLLECTION

Ready to make it new again?

One survey tells you exactly what your lift needs – and what it doesn't.
