THE YUGX MANIFESTO

Beautiful homes deserve beautiful movement.

A home is more than architecture. It is a collection of moments lived across time. Architecture, materials, light and craftsmanship are considered with care – yet the way people move through a home is too often left until the end. YugX exists to change that.

Movement is not an afterthought. It is part of architecture – and it deserves the same attention as light, material and space.

HOME MOBILITY ARCHITECTURE

HAPAM · BUNSCHOTEN, THE NETHERLANDS
AN MP REFERENCE · 2020 – PANORAMIC MP GO, THE LIFT AS PART OF THE
ARCHITECTURE

■ HOME & MOVEMENT

Every chapter of life deserves effortless movement.

Architecture shapes how a home looks. Movement shapes how it feels. A truly beautiful home considers both from the beginning.

Children run upstairs. Parents grow older. Grandparents deserve every floor of the home they helped build.

Homes evolve. Movement should evolve with them – quietly, gracefully, and for decades. That belief is where every YugX begins.

THREE GENERATIONS. ONE HOME. EVERY FLOOR.

ENGINEERING TRUST

Behind YugX stands MP.

In October 2025, MP made its formal entry into India – and chose to make it through YugX. Under an exclusive partnership, YugX represents MP's complete range across the country: solutions for residential, commercial and infrastructure projects, with installation, service and training aligned to MP's global quality standards. European engineering, delivered by an Indian company built for Indian buildings.

Behind YugX stands **MP – MAC PUAR S.A. of Spain**. YugX brings the local half of the promise: Indian engineering, Indian installation crews, Indian service that answers the phone.

"Partnering with YugX allows us to combine our European heritage in technology and design with local expertise and on-ground commitment. Together, we are confident of redefining the elevator experience for Indian customers."

OF THE ARCHITECTURE

THE COLLECTION

One philosophy. Four expressions.

The X1 is not a range of products. It is a family, designed around different homes and architectural needs while sharing one belief: perfectly balanced. You choose the expression that suits your home – from a flagship European cabin to a column-free glass circle, a panoramic scenic lift, and a slender free-standing design for the most compact of plans.

I
X1 Aria
THE FLAGSHIP

European engineering for masonry shafts. A larger cabin in the same space, gliding on coated ropes.

COATED-ROPE TRACTION ·
EN 81-20/50
MP Spain x YugX product

II
X1 Halo
THE SIGNATURE

A column-free curved-glass circle. India's first counterweight panoramic round lift for the home.

IV
X1 Nest
THE COMPACT

Free-standing and self-supporting. Fits where no lift could before – just a corner and a 100 mm step.

SELF-SUPPORTING · FITS
1M x 1M
YugX product

 FREEDOM OF INTEGRATION

Built for the home you have – or the one you're dreaming of.

REFURBISHING YOUR HOME

A lift, without the upheaval.

You no longer need a concrete shaft or heavy structural work to add a lift to an existing home. A self-supporting X1 brings its own slim structure – needing only a corner of space and a shallow step – so it settles into your home with minimal disruption, and often no digging at all.

BEST SUITED · X1 NEST & X1
LUMI

BUILDING A NEW HOME

Design around your life, not the lift.

For too long, lifts have dictated the plan. With X1, the lift adapts to your architecture instead of defining it – a compact shaft, a low pit, and a choice of finishes that let it become a considered part of the home.

BEST SUITED · X1 ARIA · X1
HALO · X1 LUMI

 THE NAVIGATOR

Which X1 is yours?

Four expressions, one decision – made in minutes. Start from your building: is there a shaft, how far does it travel, and how much floor can you give it? The pages that follow show each answer in full.

Aria

THE FLAGSHIP · MP
SPAIN X YUGX

For the masonry shaft and the long run – a true passenger lift.

- Masonry / MRL shaft · up to 45 m, 16 stops
- Up to 1000 kg · 13 persons · 1.0 m/s
- MP Spain cabin & design range

BEST FOR
New builds with a planned shaft · G+3 and beyond

Halo

THE SIGNATURE ·
PANORAMIC

For the statement – the curved circle beside the stair.

- Free-standing aluminium · no shaft needed
- Curved laminated glass, column-free
- 400 kg · 5 persons · pit from 200 mm

BEST FOR
Living spaces where the lift is furniture

Lumi

THE SCENIC · GLASS

For full-height sightlines in a clean square footprint.

- Free-standing aluminium · glass on three sides
- 400 kg · 5 persons · pit from 250 mm
- Automatic sliding doors

BEST FOR
Stairwells & atriums · retrofit-friendly

Nest

THE COMPACT ·
ESSENTIAL

For the smallest footprint and the lightest, fastest build.

- Pit from just 100 mm · overhead from 2500 mm
- 350 kg · 4 persons · single-phase 230 V
- Two-panel centre-swing doors

BEST FOR
Retrofits · tight corners · duplex apartments

YUGX X1 – I

Aria

THE FLAGSHIP

MORE ROOM FOR LIFE

More space for you – in the very same shaft.

Aria's coated-rope traction system uses a machine half the size of a conventional one. The space saved becomes cabin space – up to two more people in the same shaft. European-built, machine-room-less, and certified to the EN 81-20/50 safety standard, with automatic rescue to the nearest floor in a power cut.

PRODUCT	MP Spain x YugX product
DRIVE	Gearless traction + coated steel ropes
SPEED	1.0 m/s
CAPACITY	up to 1000 kg
PIT	from 300 mm
CABINS	MP Spain design range
STANDARD	EN 81-20/50

MORE CABIN, SAME SHAFT

YUGX X1 – II

Halo

THE SIGNATURE

ARCHITECTURE THAT MOVES

A circle of glass. A view without corners.

Halo is the lift architects have wanted and India has never been offered: a column-free, curved-glass round cabin on a true counterweight traction drive – not a screw, not a vacuum tube. Each curved pane is hot-formed and tested to exacting standards. Forces distribute evenly around the circle, and the view is seamless, in every direction, on every floor.

PRODUCT	YugX product
DRIVE	Gearless traction + steel belt
SPEED	0.4 m/s
CAPACITY	400 kg
DIAMETER	Ø1400 – Ø2000 mm
PIT	from 200 mm
GLASS	Curved laminated, column-free
STRUCTURE	Free-standing aluminium

COLUMN-FREE CURVED GLASS · 360° VIEW

 YUGX X1 – III

Lumi

THE SCENIC

DESIGNED AROUND LIGHT

The everyday lift, with a view worth taking.

Lumi celebrates natural light – glass becomes architecture rather than enclosure, letting daylight, openness and perspective travel with you. Its gearless steel-rope traction, balanced by a counterweight, delivers a smooth, whisper-quiet ride that is built to last. Its slim, free-standing aluminium structure comes in six glass tones and a wide palette of cabin finishes.

PRODUCT	YugX product
DRIVE	Gearless traction + steel ropes
SPEED	0.4 m/s
CAPACITY	400 kg
PIT	from 250 mm
OVERHEAD	from 2850 mm
STRUCTURE	Free-standing aluminium

SEE OUT AS YOU RISE

 YUGX X1 – IV

Nest

THE COMPACT

BELONGING COMES NATURALLY

Where no lift could go before.

Some homes deserve movement without major change. Nest is self-supporting – it brings its own slender structure, so a cherished home needs only a corner of space and a shallow 100 mm step, not a concrete shaft. The lowest pit in the collection and a compact footprint let it settle respectfully into existing homes and tighter plans, while the same counterweight traction keeps every ride smooth and whisper-quiet.

YUGX X1 – HALO ·
LUMI · NEST

A structure you style like furniture.

Halo, Lumi and Nest are free-standing – the shaft itself is visible architecture, standing in your home like a piece of furniture. So we finish it like one. Choose the frame colour, choose the glass tone, choose how the door meets your landing. The structure arrives colour-matched down to its door panels – no concrete shaft, no site painting, no compromise.

FLOOR, CEILING AND GLASS –
COMPOSED IN THE HOME

 THE INTERIOR STUDIO, LIVE

See your cabin before it is built.

The Interior Studio is a YugX consultation. For Aria – MP Spain x YugX product – cabins are composed live in MP CarDesigner, MP's own 3D configurator, using the MP Spain cabin range. For Halo, Lumi and Nest, your consultant works from the YugX design range on the following pages – every surface on screen before a panel is made.

0 1

Choose your style

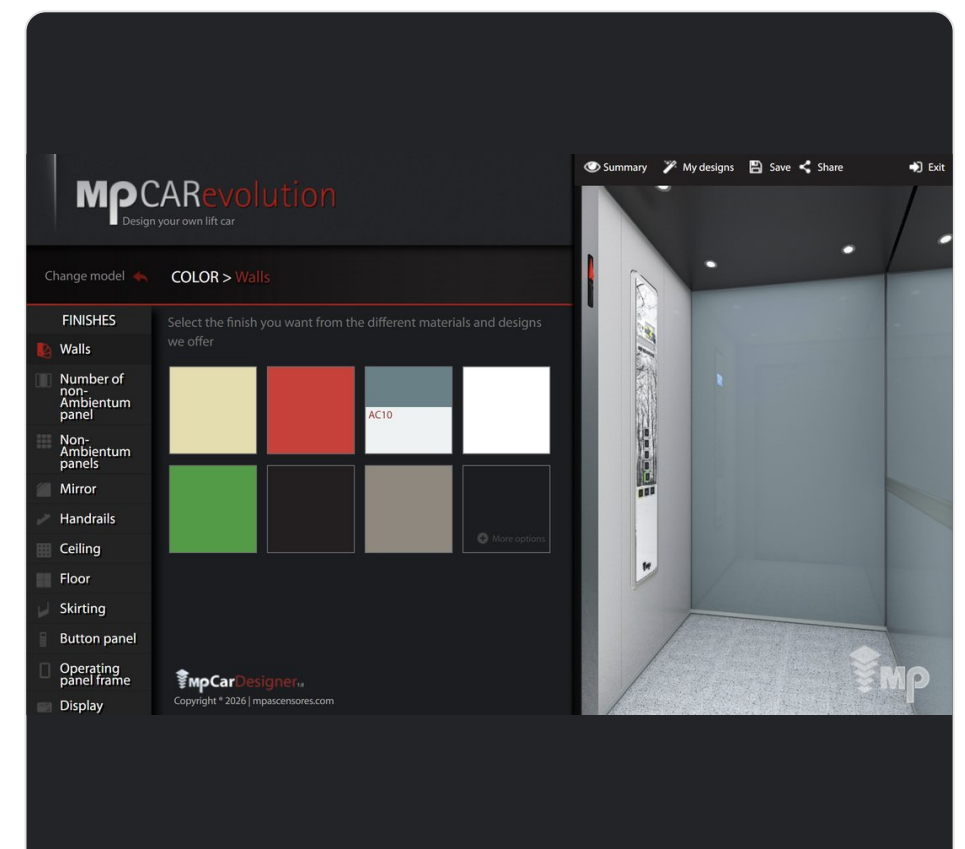

Start from your X1 model and pick a cabin family – from crisp laminates to natural textures – and see the whole car change instantly.

0 2

Compose every finish

Walls, mirror, handrails, ceiling, floor, controls – select each surface from the real material library your lift will be built from.

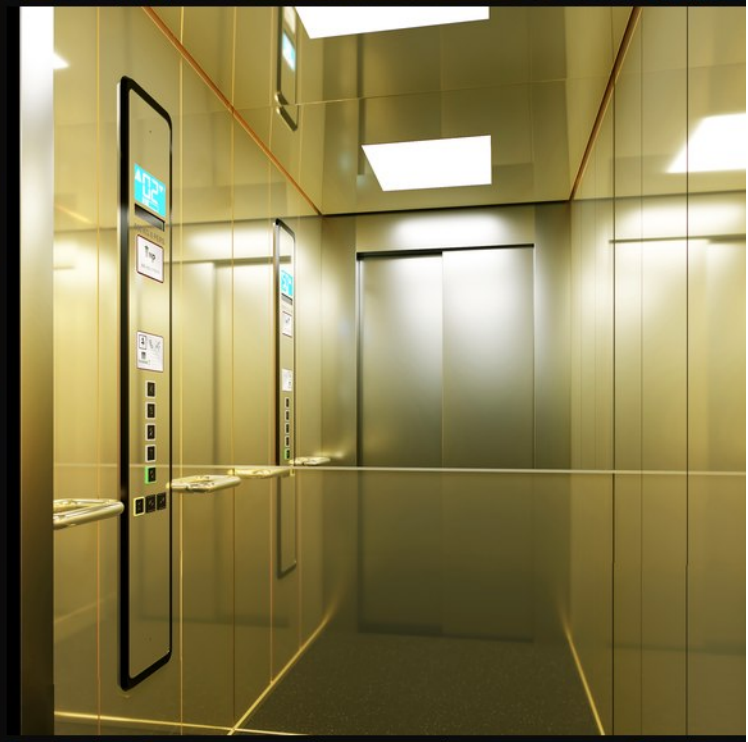

0 3

Walk through it in 3D

Turn, look up, step back. Approve the exact cabin that will arrive at your home – or save it, share it with family, and decide together.

Scan to open MP CarDesigner – compose an Aria cabin online at mpcardesigner.com. Or ask your YugX consultant for a live design session – at the Vadodara Experience Centre, or from your own living room.

 YUGX SMART MOBILITY

Every X1 is watched over.

A YugX X1 doesn't leave your home behind when the doors close. One digital platform watches over every lift we install, and yours reports to the YugX service centre from the day it is commissioned – you see everything we see.

CONNECTED 24/365 link to the YugX service centre – a real voice whenever it's needed

VISION Your lift on your phone – status, journeys, energy at a glance

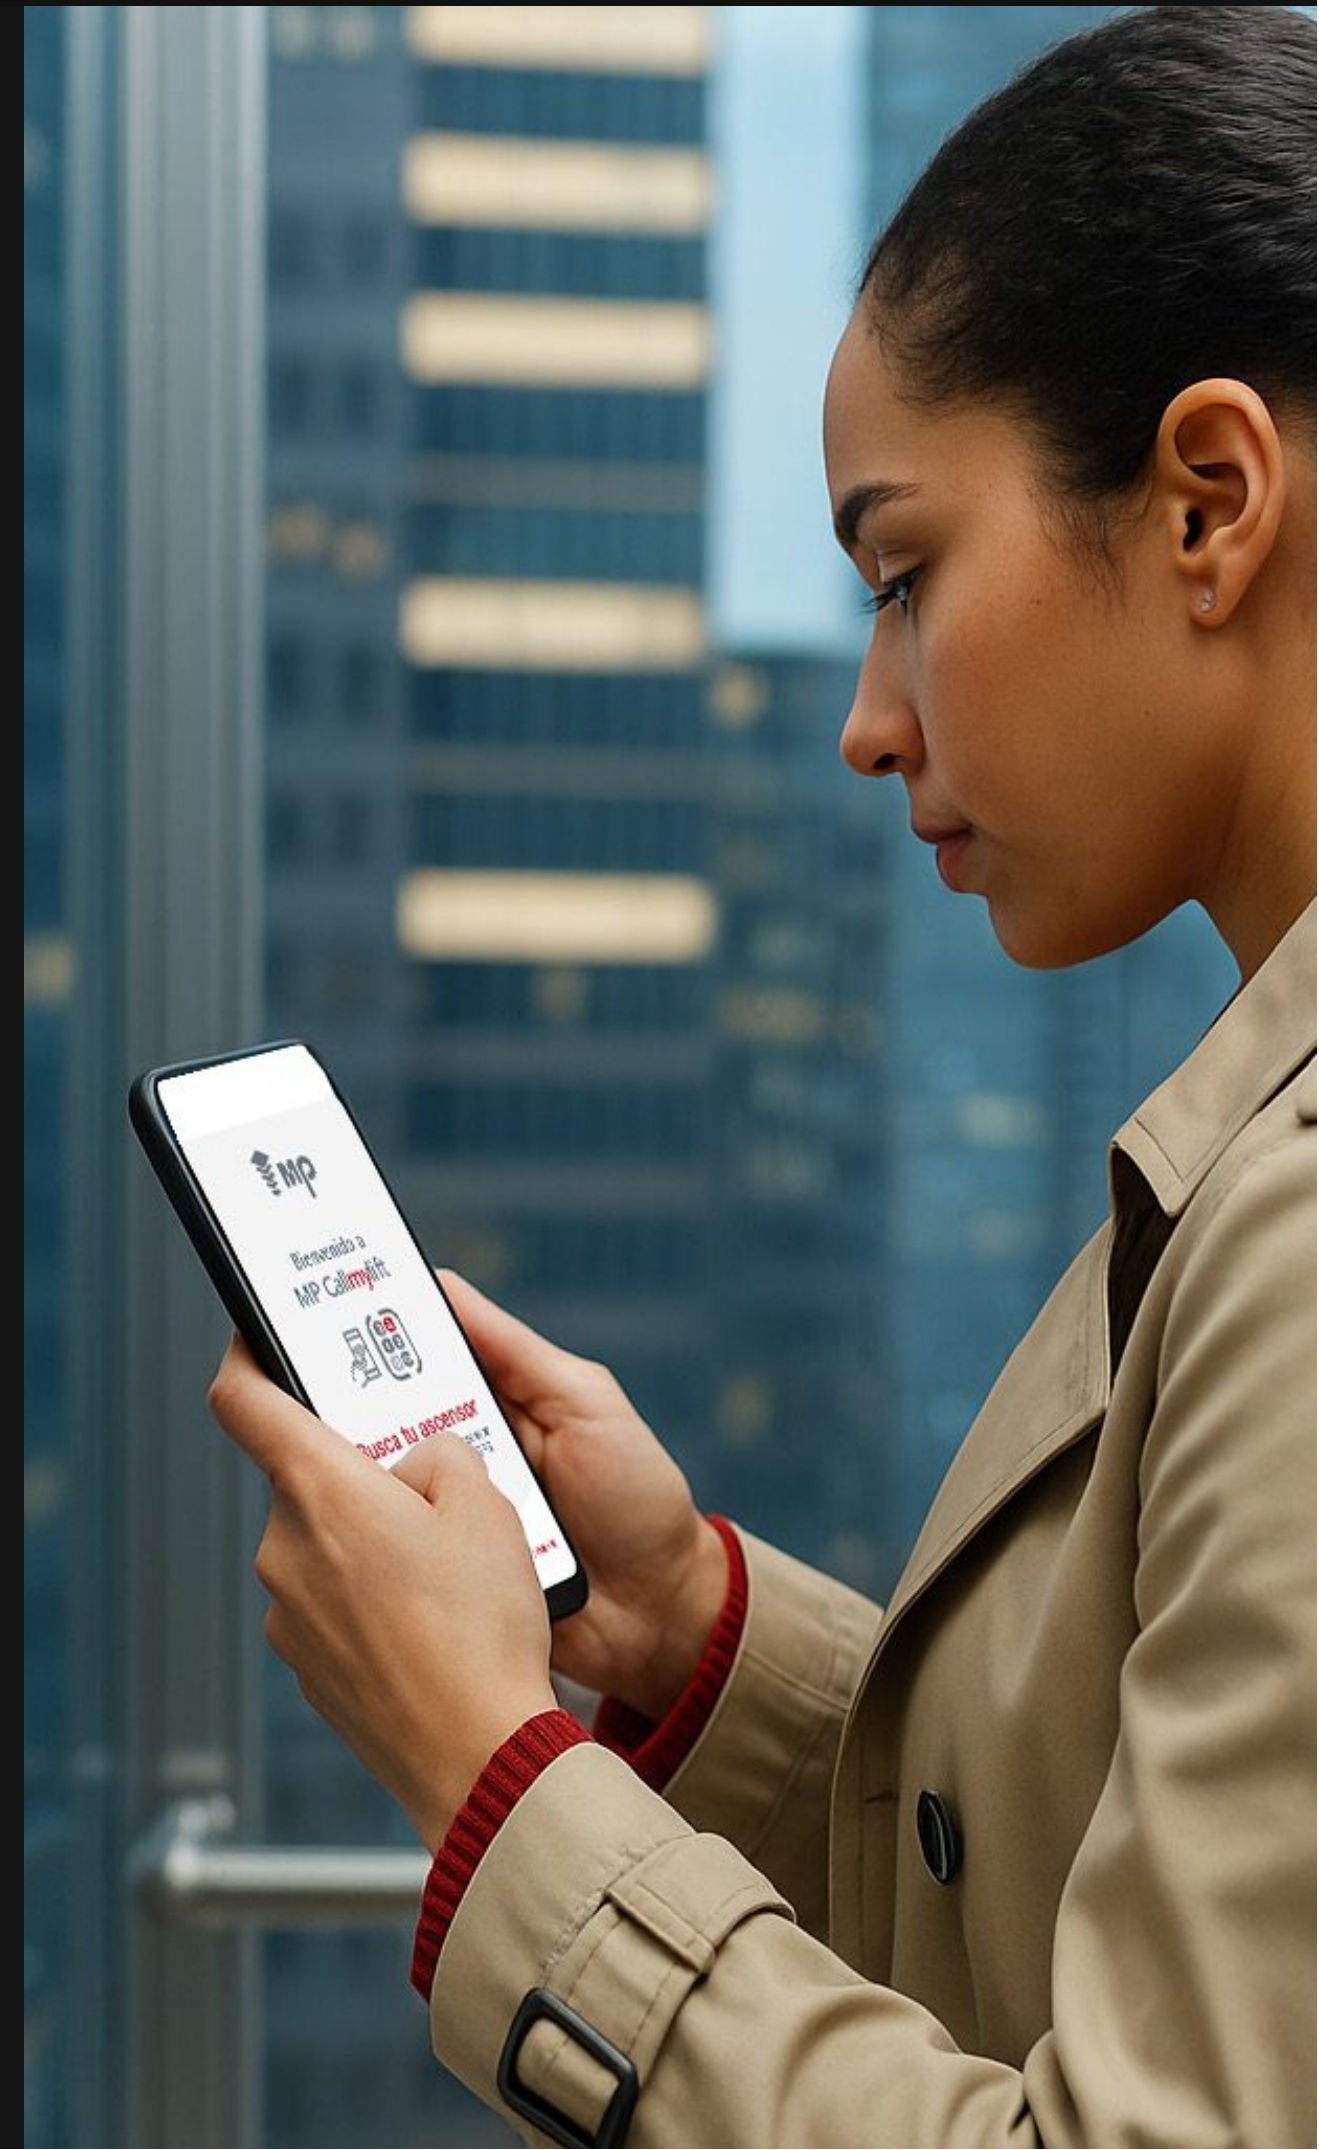

SENSE The lift listens to itself – doors, drive, ride quality, levelling

PREDICT Maintenance before failure – we often reach you before a problem does

EXPERIENCE Your home network in the cabin, smart-home control, access your way

None of this asks anything of your home. The intelligence arrives fitted, is commissioned with the lift, and is part of every YugX care plan – there is no version of an X1 that travels alone.

CONNECTED · CARED FOR · IN YOUR CONTROL

 SIMPLICITY AT EVERY STEP

A concierge approach, from first drawing to lifetime care.

Every step designed around you – so the only thing you think about is arriving.

01 Design THE INTERIOR STUDIO

Choose your model and compose your interior with your YugX consultant – see it before it is built.

02 Plan WITHIN DAYS

Our team surveys your home, confirms every dimension, and prepares a plan made to fit – not to compromise.

03 Install HANDLED FOR YOU

Our own engineers install your lift cleanly and precisely, with one point of contact throughout.

04 Care FOR ITS LIFETIME

YugX Smart Mobility and our own service team watch over your lift – planned, never reactive.

 THE YUGX PROMISE

A lift is for decades. So is our care.

Engineered to standards

Built and specified to recognised safety standards, including India's IS 17900 for home lifts – because safety is the foundation of luxury, not an afterthought.

- Certified components – traction with counterweight
- Overspeed governor & safety gear on every lift
- Documented load tests at handover

IS 17900 · EN 81-20/50

Our own service

Installed and maintained by YugX-trained engineers – no franchisees, no third parties, one team answerable to you.

- 70+ trained technicians across Gujarat
- 24/365 service centre, connected to every lift
- Genuine parts stocked in Gujarat – hours, not weeks

TRAINED · CONNECTED · IN-HOUSE

From the first drawing to every year of ownership, YugX stays with you.

Every model in the X1 collection uses traction drive with a counterweight. Dimensions are minimums and depend on the configuration chosen; final dimensions are confirmed at survey. Cabin finishes, doors, ceilings, handrails and signalisation are selected from the YugX X1 design range. A detailed X1 Technical Companion – complete drawings, shaft plans and electrical requirements – is available from your YugX consultant. *Compliance and certification to be confirmed per installation and applicable local regulation. Specifications are indicative and subject to change without notice.

 THE PRINCIPLE

Every journey, perfectly balanced.

At the heart of every YugX X1 lift is a counterweight – a quiet, elegant idea perfected over a century in the world's finest buildings.

The counterweight balances the cabin, like two children on a see-saw. The motor never lifts the full load – only the gentle difference between them. That is why a true traction lift glides so quietly, runs so efficiently, and lasts so long.

It is the difference between a lift that is **engineered** and one that is merely improvised. No air pumps. No spinning screws. No straining winch. Just balance – silent, effortless, and built to carry your family for decades.

THE MOTOR MOVES ONLY THE DIFFERENCE

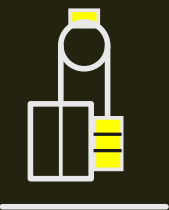

WHY TRACTION WITH A COUNTERWEIGHT

The world's finest lifts share one simple idea.

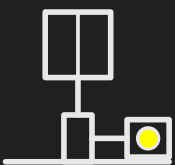

For over a century, premium elevators have relied on traction with a counterweight – because balance creates comfort, efficiency and confidence.

	X1 – TRACTION + COUNTERWEIGHT	HYDRAULIC	VACUUM (AIR)	SCREW	WINCH / DRUM
Ride & quiet	Smooth, whisper-quiet – balanced load	Jerky, with pump noise	Very jerky – audible air pump	Mechanical spindle noise	Motor strains under full load
Capacity	Generous – wheelchair & family	Good, low-rise only	Typically 2 persons	Limited	Capacity-limited
Energy	Low – motor moves only the difference	High – pumps full load each rise	High – fights air pressure	Moderate-high	High – no counterbalance
Upkeep	Clean, oil-free	Oil – leaks, smell, heat	Sealed	Spindle lubrication	Frequent service
Cabin & finish	Real glass & designer cabins	Real glass & designer cabins	Polycarbonate tube – claustrophobic without a fan	Compact cabins	Basic cabins
Lifespan	Decades – the high-rise principle	Long – oil & seals renewed	Newer – shorter track record	Screw & nut wear with use	Ropes & motor wear sooner
Today's role	The modern standard	Being replaced by traction	Recent, niche	Niche	Light-duty

HOW EACH ONE MOVES

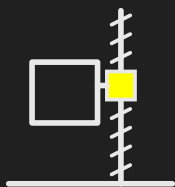

X1 · Traction + counterweight
The weight balances the cabin – the motor moves only the difference

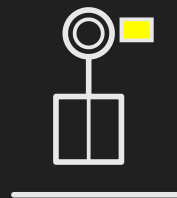

Hydraulic
A pump lifts the full load on a column of oil

Vacuum (air)
A turbine and air pressure hold the cabin in a tube

Screw
The cabin climbs a rotating screw on a drive nut

Winch / Drum
The motor winds the whole load on a single drum

Every approach has its place – hydraulic served homes well for decades, and is now giving way to traction across the world. We chose traction with a counterweight because, for a lift that carries the people you love, every day, for decades, balance is simply the better engineering.

■ YUGX X1 – HALO

The circle, at home.

Curved laminated glass, column-free, standing beside the staircase like a sculpture that happens to move. The panoramic signature of the X1 collection – on the pages that follow.

HALO – THE BRONZE CIRCLE, BESIDE THE
TIMBER STAIR

THE YUGX STORY

Born in India. Engineered with Europe. Named for a generation.

The name carries the plan: Yug – Sanskrit for era, for generation – and X for the technology that defines the next one. YugX was named for the long game.

70+

TRAINED SERVICE
TECHNICIANS

1,600+

LIFTS UNDER YUGX
CARE TODAY

OUR STORY

2008 – The foundation

Ostrich Elevators begins nearly two decades of sales, installation and maintenance across Gujarat and Western India – engineering discipline and client trust, built site by site.

October 2025 – The name, and the partner

YugX is born – named for the Sanskrit *yug*, an era – and signs its exclusive India partnership with MP, MAC PUAR S.A. of Spain: lift-makers since 1988, 165,000+ lifts manufactured, 13 million riders a day, designed and manufactured in the EU.

February 2026 – The debut

YugX × MP debuts at Smart Lift & Mobility World, Bengaluru – introducing India's first design-led lifts, and announcing the merger of Ostrich Elevators' operating business into YugX.

April 2026 – One company

Nearly two decades of field experience and European product engineering come together under one roof in Vadodara – with an Experience Centre where you can see, touch and ride what you buy.

May 2026 – New heights

YugX secures a new industrial site at Savli-Manjusar GIDC, Vadodara – the future home of a dedicated manufacturing and assembly base, and a state-of-the-art Experience Studio for the full YugX range. The next era begins.

"I have spent more than twenty years inside the elevator industry – long enough to know the difference between a lift that is merely sold and one that is truly engineered. YugX exists because Indian families deserve the second kind: honest machines built on balance, installed by our own people, and cared for by a team that answers the phone.

We named this company for an era – because that is the promise we make to every home we enter. We are here for yours."
